

Count on Ashunya To Deliver the Business Solutions You Need

Customized For You!

Team Fusion

A Project Lifecycle Management Process

A Six Sigma Solution

Executive Overview

When an Enterprise like yours requires that several moving parts in a complex Global Supply Chain operate in unison, how do you maximize productivity for You and Your Client's Organization? How can you ensure the right people, have the right tools / resources, at the right time, across the entire organization? The answer is simple: **Ashunya's Team Fusion**.

Ashunya's Team Fusion software automates the end-to-end execution, management and reporting required for Six Sigma implementations, as well as any other structured, project portfolio management methodologies. What does that mean to you? You are able to effectively and efficiently manage the entire Project Lifecycle of client business processes.

In addition, the application's user interface supports program management, project confidentiality, document and charter versioning, resource management, time tracking, and finer tracking of phase dates.

Executive Benefits:

Ashunya's commitment to our clients is "Execution & Delivery". As a result, we decided to build a process-based platform which meets the needs of every client base. Team Fusion is based on Six Sigma processes, where disparate systems or processes are tied back into a single platform, thereby offering accountability, execution, and performance measurement...and most importantly, a high Return On Investment!

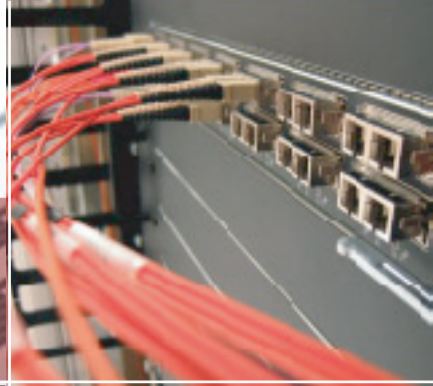

Business Process Improvement(s)

Ashunya's Business Process Solutions give clients the unique capability to directly link strategic priorities with project execution, thereby improving Collaboration, Communication and Integration within Business Processes.

Team Fusion:

- Enables you to define your client's needs / requirements - Voice of the customer (VOC)
- Transfers the VOC to the design of the product or service
- Manages processes through interactive modules
- Measures process inputs that affect customer satisfaction
- Monitors processes (static and dynamic)
- Determines processes capable of meeting customer needs
- Helps identify areas to improve / innovate to reduce variation and increase customer satisfaction
- Controls and maintains improvements realized through successful projects
- Transfers knowledge gained
- Maximizes Resource Management
- Integrates and standardizes best practices

Your Team Fusion as a Strategic Advantage

Team Fusion replaces loosely coupled, disparate solutions that cannot share information effectively or adapt easily to the dynamic nature of a growing business and its processes.

The Team Fusion Portfolio: Consists of integrated robust modules that are web-based in nature, and are scalable to meet the needs of our clients. The following provides additional details about the benefits of TEAM FUSION.

Account Management – Create one or more accounts within your organization, enabling you achieve compliance based on functions, processes, and user needs

User Management – Enables you to track and manage resources locally, nationally, and globally, as well as incorporate various roles and expertise into a given project.

- Dynamically create, and track, and approve project assignments and timesheets
- Manage large numbers of users
- Utilizes a hierarchal structure of privilege sets, enabling you to set up users with various roles and responsibilities

Process Management

Process Management involves collaboration across your entire organization, turning ideas into projects.

- From your initial vision, to defining your strategy, to outlining the details of your tactical approach
- Team Management where various dynamics are involved, and team interaction / collaboration is a key
- Hierarchy determines roles and responsibilities
- Accountability across the entire enterprise

Project Management Module – Roadmaps, templates, and task lists

- Track project status at all times and ensure completion of all deliverables
- Keep projects on track; receive alerts regarding missed deadlines
- Enable immediate corrective action on new issues
- Ensure consistent application of Six Sigma and performance roadmaps and methodologies across teams, business units and geographies

Dramatically improves efficiency of all project managers and Black Belts.

Document Repository for tools and templates, projects and other corporate materials related to your Enterprise Engagement

Reports Dashboard - Mechanism for monitoring primary (Key Performance Indicators - KPI's) and secondary (e.g., cycle time) performance metrics as required by your Enterprise Engagement

- My Dashboard
- Metrics Management
- Performance Management

Financials Manager - Integrated financial

The Team Fusion Advantage :

AAshunya has built its business by focusing on solutions for Enterprise Performance Management initiatives like Six Sigma. We work with you to make sure your software implementation is successful and delivers the results you expect:

- Single system for multiple initiatives
- Directly aligns strategy goals and operations objectives
- Fully-featured, and entirely configurable
- Completely browser based, accessible anywhere, at any time
- Globalized yet GLOCALized
- Deploy in-house or hosted
- Secure, scalable and extensible architecture
- Easy to use and supported by an unmatched community of Six Sigma leaders and consultants

TEAM FUSION: A portal which enables you to achieve your Strategic and Tactical objectives, and turn your Vision into a reality.
