

Customized For You!

Customized For You!

The Ashunya Advantage - "We Execute to Deliver!"

We truly want our customers to benefit from a "Value Add", at a competitive price and not a bargain price, where you lose credibility with your customers.

Ashunya truly understands customers expectations and abide by it.

Ashunya is a single stop place for these processes. In today's economy, organizations take variety of steps to cut down on work force, trim the budgets constantly, trim their inventory and reduce the day sales outstanding.

All this happens due to miscommunications within various suppliers and several projects being conducted without accountability. Ashunya has been successful by utilizing our concept and Applied Knowledge through Not just Products....but with implemented Solutions

Ashunya has the expertise to offer a full suite of solutions to satisfy your business computing requirements. Whether you need network planning and implementation, Consulting or Software Development, Configuration or working specific to a Vertical Industry, or one of a host of other services that we offer, you can have confidence with Ashunya.

Single, Integrated Multiple Initiative System

Ashunya is designed specifically to accommodate the lifecycle of customers' business processes that have unique workflows, requirements, process roadmaps, project terminology, networking, implementation, post-implementation to software development and reporting within a single integrated system.

With Ashunya, Executives gain full visibility into all projects to communicate strategic goals and track performance thus making Ashunya accountable for any products/services.

Proven solutions for Six Sigma and Enterprise Performance Improvement across your entire organization through a single source.

Ashunya enables technology to improve business processes

Ashunya, not only has the resources, but has proven as a Valued Partner to several of its strategic partners in every aspect of supply chain networks, from procurement to IT Services, Consulting and Post Implementation Services. Whether you need individual services, integrated products, or industry specific solutions - it's all from a single source.

WHAT CAN ASHUNYA DO FOR YOU?

- Procurement activities of hardware & software
- Implementation activities from the wiring of LAN (Local Area Network) & WAN (Wide Area Network) to coordinating Project Management activities with ISP's (Internet Service Providers)
- Installation/Configuration by coordinating activities from supply chain perspective
- Post Implementation Services for your company
- Consulting an implementation of Software Integration and other Services through Ashunya's BPO (Business Process Outsourcing)
